

Sponsor Feedback

Overview

Throughout the semester, our team met with our sponsor, Sam, about once a month to check in on the progress we had and to make sure we are keeping up with his standards, as well as gather feedback.

Feedback Summary

Overall, Sam was consistently satisfied with the progress we made during each sprint. Each demo showed consistent improvements on the overall progress of the core functionality of our app. Feedback was all positive, with no major concerns or requested changes to core features. Sam was very supportive of the decisions we made when it came to appearance or how we handled core functionality.

On our last meeting with Sam, we got feedback from him saying “This is exactly how it looked when I first had this idea.”

Summary

Overall, Sam’s feedback was very positive and the final product met his expectations and reflected his original concept.
